Kode Mata Kuliah (<i>Course Code</i>): TIF311	Nama Mata Kuliah (<i>Course Name</i>): Multimedia Systems		
Program Studi (<i>Study Program</i>): Informatics	Fakultas (<i>Faculty</i>): Engineering and Computer Science		
Mata Kuliah Pra-Syarat (<i>Course Pre-requisite</i>): TIF208 - Digital Signal Processing	Kredit (<i>Credit</i>): 3		
	Kuliah (<i>Lecture</i>): 3	Tutorial: 0	Praktikum (<i>Practicum</i>): 0
Revisi (<i>Revision Status</i>): 2.1	Semester: Ganjil/Odd Tahun Akademik: 2016/2017		
Lecturer's Name: Irwan Prasetya Gunawan			

COURSE DESCRIPTION

This course introduces the students the followings:

- Broad grounding in issue surrounding multimedia,
 - role of multimedia Systems
 - design of multimedia Systems
 - Multimedia data — digital audio, graphics and video, etc
- underlying concepts and representations of sound, pictures and video,
- data compression and transmission,
- integration of media,
- delivery of multimedia.
- Applications

COURSE OBJECTIVES

Upon completion of this course, the student should be able to:

- Understand the relevance and underlying infrastructure of the multimedia systems.
- Understand core multimedia technologies and standards (Digital Audio, Graphics, Video, VR, data transmission/compression)
- Be aware of factors involved in multimedia systems performance, integration and evaluation

Topics in the module include the following:

- Introduction: Multimedia applications and requirements (e.g., overview of multimedia systems, video-on-demand, interactive television, video conferencing, hypermedia courseware, groupware, World Wide Web, and digital libraries).
- Audio/Video fundamentals including analog and digital representations, human perception, and audio/video equipment, applications.
- Audio and video compression
 - perceptual transform coders for images/video (e.g., JPEG, MPEG, H.263, etc.),
 - scalable coders (e.g., pyramid coders),
 - perceptual audio encoders.
 - Image and video processing applications and algorithms.
- Multimedia hardware and software including computer architecture and devices, OS support, network protocols, multicast networks (MBONE), continuous media system services and toolkits, and digital media servers and storage systems.
- Advanced Multimedia: Virtual Reality, Augmented Reality, Multimedia databases/digital libraries
- Multimedia systems: Case Studies (e.g., paper, research, simulated environments, documents, etc.).

Syllabus – MULTIMEDIA SYSTEMS**METHODS OF INSTRUCTIONS**

Classroom instruction consists of lectures and practical problem solving, supplemented by visual aids designed to assist the student to successfully meet the courses learning objectives.

It is imperative that students take an active interest in the course. To succeed in this course, students must read, think, and write in a critical and analytical manner and this takes time and practice. Such practice can only be achieved by working theoretical and practical exercises. When troubles arise, and they will, the student must ask questions which may be directed to the instructor or other students in a variety of ways.

Students are also encouraged to work together on problem sets as part of their exercises. However, individual must ultimately demonstrate the understanding of the material by writing up his/her own solutions without the help of other students or their written work.

On average students need to spend, at least, 6 hours of study and preparation per week for this course.

ATTENDANCE REQUIREMENT

Comply with academic rules. Punctuality and regular attendance in classes is of prime importance for successful completion of this course. Students will be expected to arrive for class on time and to remain in class until the end of the class session.

Absence from lectures shall not exceed 22%. Students who exceed the 22% limit without a medical or emergency excuse acceptable to and approved by the Dean of the Faculty shall not be allowed to take the final examination and shall receive a mark of zero for the course.

ASSESSMENT

Coursework evaluation will be weighted as follows:

- Mid Semester Test: 20%
- Final Semester Test: 30%
- Assignments/Quiz: 20%
- Presentations: 20%
- Class participation: 10%

MATERIAL REFERENCES AND REQUIRED SUPPLIES

Prescribed Textbooks:

- [1] Ze-Nian Li, Mark S. Drew, Fundamentals of Multimedia, Prentice-Hall, 2004

Additional sources:

COURSE OUTLINE

Session	Topics & Sub-Topics	Methods	References	Assignment
1	Introduction: (a) Introduction to the terminology and description of informatics and multimedia (b) Components of multimedia (c) Hypermedia (d) WWW (e) Research topics in multimedia informatics	Lecture, Discussion	[1] Chapter 1	Probs: 3, 4, 5, 6
2	Audio processing: (a) Human auditory system (b) Sampling (c) Digitization of sound (d) Quality measurement of audio signals	Lecture, Discussion	[1] Chapter 6	Probs: 1, 6, 9, 10

Syllabus – MULTIMEDIA SYSTEMS

3	<p>Audio compression:</p> <ul style="list-style-type: none"> (a) CD Audio (b) Basic PCM (Pulse Code Modulation) (c) Adaptive PCM (d) Perceptual coding (e) MPEG Audio 	Lecture, Discussion	[1] Chapter 6, 13, and 14	Probs: 6.13-14, 13.5, 14.4, 14.8
4	<p>Fundamental mechanism of Human Visual System:</p> <ul style="list-style-type: none"> (a) Structure of the human eye (b) Image formation in the eye (c) Brightness adaptation and discrimination (d) Contrast (e) Masking 	Lecture, Discussion	[1] Chapter 4.1	Probs: 1, 2, 5, 6, 7
5	<p>Image/Video Data Representations:</p> <ul style="list-style-type: none"> (a) Image data types (b) File formats to represent images (c) Various types of video signals (d) Analog video (e) Digital video 	Lecture, Discussion	[1] Chapter 3.1-2, 5.1-3	Probs: 3.1, 3.3, 5.1, 5.3, 5.4, 5.6, 5.10
6	<p>Basic data compression:</p> <ul style="list-style-type: none"> (a) Lossless compression algorithm (b) RLC, VLC (c) Huffman coding, arithmetic coding (d) Lossy compression algorithms (e) Rate distortion theory (f) Quantization (g) Transform coding 	Lecture, Discussion	[1] Chapter 7.1-4, 7.6, 8.1-5	Probs: 7.1-3, 7.5-6, 8.4-7
7	<p>Image Compression Standards:</p> <ul style="list-style-type: none"> (a) Image compression basic (b) JPEG Standard (c) JPEG2000 Standard (d) Other image compression standards 	Lecture, Discussion, Quiz	[1] Chapter 9.1-9.2, Paper articles	Probs: 9.1-2, 9.4-6
MID SEMESTER TEST				
8	<p>Basic Video Compression Standards:</p> <ul style="list-style-type: none"> (a) Video compression techniques (b) Motion compensation (c) Methods for searching motion vectors (d) Video coding standards: MPEG 1/2/4 (e) Object based video coding in MPEG4 (f) Video coding standards: H.261, H.263, H.264 	Lecture, Discussion	[1] Chapter 10.1-5, 11.2-3, 12.1-4	Probs: 10.{1/3/4/7/8/9}, 11.{1/3/4/5}, 12.{1/3}
9	<p>Advanced Topics in Video Coding:</p> <ul style="list-style-type: none"> (a) AVC (b) HEVC (c) Watermarking (d) Segmentation (e) Streaming 	Lecture, Discussion	Paper articles	Practical problems / projects
10	<p>Error control:</p> <ul style="list-style-type: none"> (a) Error Resilience techniques: data partitioning, FEC (b) Error Concealment methods (c) congestion control 	Discussion	Paper articles	Practical problems / projects
11	<p>Network Layer Support:</p> <ul style="list-style-type: none"> (a) Network function to support multimedia system (b) Analyzing network traffic in multimedia systems (c) QoS (d) Access and Core Broadband Network (e) Content Delivery Network 	Discussion	Chapter 15	Probs: 15.{1/5/6/8/10}

Syllabus – MULTIMEDIA SYSTEMS

12	Multimedia Networking: (a) Internet protocols to support multimedia networking (b) Multimedia applications over the network (c) RTP, RTCP (d) Audio and video streaming	Lecture, Discussion	Chapter 16	Probs: 16.{1/4/5/7/9}
13	Review: (a) Review material for the finals (b) Project presentation (c) Discussion (d) Quiz	Lecture, Discussion, Quiz	Materials after mid-test	Students' Presentation
14	Review: (a) Review material for the finals (b) Project presentation (c) Discussion (d) Quiz	Discussion, Quiz	Materials after mid-test	Student' Presentation
FINAL SEMESTER TEST
