COURSE DESCRIPTION

This course presents a comprehensive overview of data communications. It is based on the bottom-up approach to data communications. The course emphasizes data communications concepts as outlined by the 7 layer Open System Interconnection (OSI). This course introduces the architecture, structure, functions, components, and models of data communication network including computer network, Internet, and mobile. The principles and structure of IP addressing and the fundamentals of Ethernet concepts, media, and operations are introduced to provide a foundation for the curriculum.

COURSE OBJECTIVES

Upon completion of this course, the student should be able to:

- Understand the fundamentals of data communications.
- Evaluate and apply formulae to practical communication problems concerning bandwidth, noise and symbols.
- Understand the different media available to support data communications.
- Understand the role of the various protocols in facilitating the transfer of data across a communication network.
- Appreciate the role of the ISO seven layer model which attempts to standardise communication.

METHODS OF INSTRUCTIONS

The course is delivered as a class-based course. Classroom instruction consists of lectures and practical problem solving, supplemented by visual aids designed to assist the student to successfully meet the courses learning objectives.

It is imperative that students take an active interest in the course. To succeed in this course, students must read, think, and write in a critical and analytical manner and this takes time and practice. Such practice can only be achieved by working theoretical and practical exercises. When troubles arise, and they will, the student must ask questions which may be directed to the instructor or other students in a variety of ways.

Students are also encouraged to work together on problem sets as part of their exercises. However, individual must ultimately demonstrate the understanding of the material by writing up his/her own solutions without the help of other students or their written work.

On average students need to spend, at least, 6 hours of study and preparation per week for this course.

ATTENDANCE REQUIREMENT

Comply with academic rules. Punctuality and regular attendance in classes is of prime importance for successful completion of this course. Students will be expected to arrive for class on time and to remain in class until the end of the class session.

Absence from lectures shall not exceed 22%. Students who exceed the 22% limit without a medical or emergency excuse acceptable to and approved by the Dean of the Faculty shall not be allowed to take the final examination and shall receive a mark of zero for the course.

Syllabus – DATA COMMUNICATION

ASSESSMENT

Coursework evaluation will be weighted as follows:

- Mid Semester Test: 30%
- Final Semester Test: 40%
- Others (class participation, Assignments/quiz/pretest): 20%

COURSE OUTLINE

Note: all materials are delivered by means of in-class lectures and class room discussions.

Session	Topics & Sub-Topics	Methods	References	Assignment
1	Introduction to Data Communications: (a) Introduction to Data Communications (b) Historical review of Computer Networking (c) Computer Networking Hardware (d) Computer Networking Software (e) Network Architecture	Lecture, Discussion	[1] ch.1, [2] ch.1, [2] ch.1.2, [2] ch.1.3	Probs: 1, 1.1, 1.2, 1.3, 1.4, 1.5
2	Fundamental of Communication: (a) Reference Model (b) Standardisation (c) Network Topologies (d) Data Communication Basics (e) Packet-based Data Communication (f) Circuit-switched vs Packet-switched (g) Message switching datagram, virtual circuit (h) Connection vs Connectionless oriented	Lecture, Discussion	[2] ch.2.1 [2] ch.1.4, [1] ch. 2 [2] ch.6, [1] ch.1 [1] ch.1 [2] ch.2.1 [2] ch.5.1.1 [1] ch.8.1 [2] ch.5.1.1, 5.1.3, 5.1.4 [2] ch.5.1.3, 5.1.4	Probs: 2.1, 2.2, 2.3, 2.4, 2.5, 2.6, 2.7, 2.8, 2.9
3	Wired/wireless communication network: (a) Wired-based Communications (b) Wireless Communication (c) Examples of Communication Networks	Lecture, Discussion	[1] ch.7.1 [1] ch.7.2	Probs: 3.1, 3.2, 3.3
4	Data link layer basics: (a) Data Link Layer Basics (b) Encoding, Framing (c) Error Detection, error correction, reliable transmission (d) Sliding Windows	Lecture, Discussion	[2] ch.3 [1] ch.4.1, 4.2, [2] ch.3.1.2 [2] ch.3.2, [1] ch.10, 10.2 [2] ch.3.4	Probs: 4.1, 4.2, 4.3, 4.4
5	Channel allocation: (a) Channel Allocation (b) Multiple Access Protocols (c) Ethernet	Lecture, Discussion	[2] ch.4.2, [1] ch.12.1 [2] ch.4.3	Probs: 5.1, 5.2, 5.3

Syllabus – DATA COMMUNICATION

6	Network layer: (a) Network Layer (b) Network Layer Addressing (c) IPv4 and IPv6 (d) Routing Algorithm	Lecture, Discussion	[1] ch.19, 20, 21, 22 [2] ch.5.6.2, [1] ch.19.1, 19.2, 21.1 [2] ch.5.6.1, 5.6.2 [1] ch.19.1, ch.20.2 [2] ch.5.1.1, [1] ch.22.3, 22.4	Probs: 6.1, 6.2, 6.3, 6.4
7	Spanning Tree and intra/interdomain routing protocols: (a) Spanning Tree (b) Intra/inter-domain routing protocols (c) CIDR	Discussion, Quiz	[2] ch.5.2.7 [1] ch.22.3 [2] ch.5.6.2	Probs: 7.1, 7.2, 7.3
MID SEMESTER TEST				
8	Internet Protocol and Quality of Services: (a) Internet Protocol (IP) (b) Quality of Services (c) Congestion Control	Lecture, Discussion	[2] ch.5.4 [1] ch.24.5, 24.6, 24.9	Probs: 8.1, 8.2, 8.3
9	End to end protocol, data presentation: (a) End to end protocol (b) Data presentation (c) Compression	Lecture, Discussion	[1] ch.1, 29.1 [2] ch.7.4.2 [1] ch.29.2	Probs: 9.1, 9.2, 9.3
10	Transport services and protocol: (a) Transport services (b) Transport protocol	Discussion	[2] ch.6 , [1] ch.23	Probs: 10.1, 10.2
11	UDP, TCP and Performance Issues: (a) UDP (b) TCP (c) Performance issues	Discussion	[2] ch. 6.4, [1] ch.23.2 [2] ch.6.5, [1] ch.23.2, 23.4 [2] ch.6.6	Probs: 11.1, 11.2, 11.3
12	Application Services (DNS, e-mail, www): (a) DNS (b) Email (c) WWW (d) Multimedia (e) Streaming	Lecture, Discussion	[2] ch.7.1, [1] ch.25 [2] ch.7.2, [1] ch.26.2 [2] ch.7.3 [1] ch.27.1, 27.2 [2] ch.7.4, [1] ch.29.1 [2] ch.7.4.3, [1] ch.29.3, 29.4	Probs: 12.1, 12.2, 12.3, 12.4, 12.5
13	Wireless and Wimax: (a) Wireless networking (b) Security (c) Wireless broadband (d) WIMAX	Lecture, Discussion, Quiz	[2] Ch.4.4 [2] ch.8.6.4 [2] ch.4.5	Probs: 13.1, 13.2, 13.3, 13.4
14	Network and Internet Security: (a) Network Security Basic (b) Cryptography (c) Symmetric Key Algorithm (d) Public Key Infrastructure (e) Internet Security (f) IPSec (g) PGP (h) Firewalls	Discussion, Quiz	[2] ch.8, [1] ch.31 [2] ch.8.1, [1] ch.30 [2] ch.8.2, [1] ch.30.2 [2] ch.8.3, [1] ch.31.7 [1] ch. 32 [1] ch.32.1 [1] ch.32.3 [1] ch.32.4	Probs: 14.1, 14.2, 14.3, 14.4, 14.5, 14.6, 14.7, 14.8
FINAL SEMESTER TEST
